Brand asset kit - logo system, palette, usage, and social templates

01 / Logo system

Use the primary logo wherever space allows. Use the mark-only version for favicons, social avatars, video watermarks and tight placements. Keep clear space around the logo equal to at least the height of the T crossbar / about 10% of the logo width.

Minimum digital size: full logo 220 px wide; mark-only 32 px wide. Avoid stretching, shadows, outlines, or unapproved color changes.

Typography direction

Use a strong geometric sans for TVMG and campaign headlines: Montserrat ExtraBold, Sora ExtraBold, or Manrope ExtraBold. Use Inter, Manrope, or Noto Sans for body copy, captions, decks and UI. Keep supporting text tracked-out and uppercase for a training/media systems feel.
